Re: \_\_\_\_\_

DOB: \_\_\_\_\_

Dear Parent:

Your child is now eighteen years old. Congratulations on achieving this significant milestone! It has been our pleasure to provide your family with quality pediatric health care.

Now that your child has reached the age of eighteen and has graduated from high school, we will be able to provide him/her with medical care until the age of 21. Please note; however, that we will need you and your child to complete some additional release forms. In addition, some of the services we can provide will be limited. For example, we will be able to exam your young adult in the office, but if they are admitted to the hospital we will need to transfer care to the appropriate attending physician.

We are available to answer any of your questions to help you with any transitional needs. Please contact our Office Director, Margie Peyton, RN at 561-509-5009, x331.

If you choose to transfer/discharge your young adult to another Practitioner, with your written approval, the medical records will be made available to your new practitioner. Once we are in receipt of your discharge request, it will go into effect upon receipt of your request.

Warmest regards to you and your family,

The Physicians, Nurse Practitioners and Staff of Palm Beach Pediatrics
